## Tutor

A B.D.S Graduate in 1975, Dr. Silwadi maintained a general dentistry private practice in Abu Dhabi, UAE as well as in Toronto, Canada. Since 2000, as an M.Sc. specialist prosthodontist, he is running a multi speciality dental center and is limiting his practice to the fields of prosthodontics, Implantology, and CAD/CAM esthetic dentistry. Opinion leader in the Prosthodontic field for the last eight years. His academic

achievements as member of the Royal College of Dental Surgeons of Ontario Canada, Certificate of the Dental Examining Board of Canada, ISCD Certified International Trainer keep his name as a well-known consultant in CAD/CAM.

## Course Objectives

Ceramic Veneers present one of the most conservative aesthetic treatment modalities. They are widely and successfully used to correct a wide scope of problems that may arise in the highly aesthetic zone of anterior teeth. These problems include mal alignments, discolorations both intrinsic and extrinsic, diastemas, traumatized teeth, as well as mal shaped teeth. This treatment modality demands that the restorative dentist acquire proper knowledge and skills as well as following certain protocols to be able to achieve the desired results. This presentation will discuss factors that aspect preparation, shade selection, temporization, as well as bonding of veneers.
