

The All Ceramic Course: How to Choose the Best Ceramic Material and Prepare for the Different Type of Crowns We Currently Have? Hands-On Training

02 November 2017 | IH, DFC, Dubai, UAE

Organised by:
CAPPevents
exhibitions & conferences

Accredited by:

ADA CER.P® | Continuing Education
Recognition Program

Centre for Advanced Professional Practices (CAPP) is an ADA CER.P Recognized Provider. ADA CER.P is a service of the American Dental Association to assist dental professionals in identifying quality providers of continuing dental education. ADA CER.P does not approve or endorse individual courses or instructors, nor does it imply acceptance of credit hours by boards of dentistry.

CAPP designates this activity for 7 CE Credits

Est. HAAD 7 CME | Est. DHA 7 CME

Tutor

Dr. Mahn graduated from the University of Chile in 2004. He received the German DDS, one year later. The New York University College of Dentistry certified him as Implantologist in 2007. In 2008, he published his doctorate thesis in 2008 titled "Osseointegration of zirconia implants, an in vivo study" and got his doctorate degree in 2010 from the University of Duesseldorf, Germany. Between 2007 and 2009 he worked for Ivoclar Vivadent at the ICDE

(International Center for Dental Education), Schaan, Liechtenstein and he is presently a guest lecturer at several universities. He is the author from a variety of articles and has been lecturing intensively about Esthetic Dentistry and Implantology in more than 50 countries.

Abstract

The participants will first prepare a traditional crown, like we use to do for PFM. Then another preparation is going to be done, based on the new concept of full veneers done with glass ceramics. Monolithic structures are going to be simulated. Afterwards a dark stump is going to be used to compare the effect of an opaquer and the different type of ceramic materials. The relevance of cements, space, stump shade and ceramic materials is going to be highlighted. How to temporize those discolored teeth is going to be demonstrated. New cements are also going to be shown.

Course Objectives

- ☀ Understand the importance of the choice of the ideal ceramic material
- ☀ Understand the last improvements in material science and the treatment possibilities with modern ceramics
- ☀ Understand the biomechanics involved when teeth are prepared and how to prepare for each ceramic type
- ☀ Decide when to indicate a hybrid ceramic, a glass ceramic and an oxide ceramic
- ☀ Understand the importance of space and stump color
- ☀ Understand which type of cement is more suitable for each ceramic material

Agenda

09:00 - 10:30

Lecture:

- History of ceramic materials
- Classification of ceramic materials
- Tooth biomechanics
- Glass Ceramics, hybrid ceramics and oxide ceramics. Advantages and disadvantages
- CAD-CAM vs pressing, injection or layering
- How to hide discolorations
- How to hide metal posts
- How to match implants with crowns and veneers
- Preparation design
- Traditional crowns, partial crowns and different type of veneers. What is suitable for each material?
- Cementation protocols

10:30 - 11:00

Coffee Break

11:00 - 12:30

- Interactive session
- Clinical cases discussion: Practical application

12:30 - 14:00

Lunch

14:00 - 15:30

Hands-on:

- Preparation of a classic crown of an endodontically treated tooth with a post
- Preparation of modern crowns and veneers

15:30 - 16:00

Coffee Break

16:15 - 18:00

Hands-on:

- Preparation of a dark stump and use of opaquers
- Temporization and cementation demo
- Discussion and end of the program

2200 AED (599 US\$) COURSE PRICE | **3500 AED (952 US\$) WITH CONFERENCE**
