The perfect combination of strength, esthetics and translucency

- Polychromatic MT Multi discs for efficiency and highly esthetic restorations
- High flexural strength and fracture toughness for a broad indication range
- Low wall thicknesses for less invasive preparations
- Three translucency levels (MO, LT, MT) for natural esthetics
Thanks to its genius-like features, the CS 3600 family allows you to enjoy intraoral scanning that’s more intuitive, efficient and powerful. You’ll end up with a smarter acquisition process and the ability to improve clinical outcomes.

- Automatically fills in holes with appropriate color for the optimal aesthetic outcome
- Warns users in real time about areas that require additional scanning and indicates the ideal direction to scan in
- Facilitates patient occlusion analysis with automatic occlusion mapping
- Eliminates manual post-scan adjustment by automatically removing unwanted soft tissue

Best of all, the CS 3600 surpasses the competition by delivering the best performance for overall trueness.*
