Abstract

During this course, clinical solutions to treat narrow ridges from diagnosis to implant placement, will be described. The Piezoimplant will be presented as an alternative and reliable solution to high morbidity grafting techniques. Step by step procedure leading to placement of the Piezo-implant in narrow ridges will be explained based on clinical, anatomic and biologic criteria.

During the hands-on part, participants will get familiarized with ultrasonic equipment and surgical tools, and will apply the step by step surgical technique to place Piezoimplants into animal bones.

Learning Objectives & Outcomes

- Overview various treatment alternatives in the narrow ridge.
- Understand the advantages of ultrasonic implant site preparation.
- Learn the step-by-step clinical procedure for placement of the piezoimplant.
- Understand long term bone response following piezoimplant placement.

Teaching Methods

Formal and didactic lectures, case studies and discussion.
The hands-on training session will consist of the practice of skills.
