Abstract

This course is designed to provide theoretical and clinical instruction in nitrous oxide/oxygen analgesia in accordance with American Dental Association, and Dental Faculties of the Royal Colleges of Surgeons and the Royal College of Anaesthetists (UK) guidelines. This course will enable participants to achieve understanding in the administration of nitrous oxide/oxygen analgesia for dental treatment. The course is intended for general dentists and dental specialists. In the afternoon hands-on training session, participants will have the opportunity to administer and undergo nitrous oxide sedation under close....
