

Vital pulp treatment, crown preps and space maintainers – Advanced pediatric dentistry masterclass

HANDS-ON TRAINING

Dr LaRee Johnson, USA

7CE
Credits

DATE:
12 Apr 2025, 09:00 - 18:00

LOCATION:
Dubai | UAE

TARGET AUDIENCE:
General Dentistry, Pediatric Dentistry

Abstract

This clinical micro-residency in Paediatric Dentistry will cover clinical comprehensive pediatric dentistry. The session will begin with a review lecture on vital pulp therapy, crown preps and space maintainers. The hands-on session will include vital pulp therapy covering clinical keys to precision caries removal for indirect pulp cap medicaments as well as steps to successful pulpotomies for primary anterior and posterior teeth. Restorative techniques covered will include stainless steel crowns, zirconia crowns, and state-of-the-art full resin polymer crowns. The day will conclude with “extracting” typodont teeth and the adaptation of bands and fitting of chairside unilateral space maintainers to include band and loops and distal shoes. Techniques to prevent cement washout and band debonding will be covered.

Learning Objectives

- Understand the optimal placement of medicaments for vital pulp therapy to promote healing.
- Develop efficient techniques for accessing the pulp chamber and proper adaptation of MTA to promote dentinal bridging.
- Master efficient preparation techniques for all primary crowns.
- Develop expertise in the fitting back-to-back zirconia and cementation of primary crowns.
- Learn how to fit chairside fixed unilateral space maintainers for optimal retention.

Agenda

09:00 – 09:30	Lecture – Overview of Vital Pulp Treatment, Crown Preps and Space Maintainers
10:30 – 11:00	Coffee Break
11:00 – 11:30	Prepping to prepare for indirect pulp caps on the upper left central incisor and lower left second primary molar
11:30 – 12:00	Pulpotomies on the upper left central incisor and lower left second primary molar
12:00 – 13:00	Prepping maxillary incisors for zirconia crowns
13:00 – 14:00	Lunch
14:00 – 14:30	Prep upper right first primary molar for stainless steel crowns Prepping lower right primary molars for high-strength resin polymer crowns
14:30 – 15:30	Prepping lower left primary teeth (second primary molar- central incisor) for zirconia crowns
15:30 – 15:45	Coffee Break
15:45 – 16:30	Prepping upper left canine and primary molars for zirconia crowns
16:30 – 17:00	“Extract” lower left first permanent molar and second primary molar as well as an upper right second primary molar, and lower right first primary molar (replace lower left first primary molar and lower right second primary molar teeth) and place upper and lower right band and loop and lower left distal shoe
17:00 – 17:30	Wrap up existing work or challenge prep lower right first permanent molar for a zirconia crown
