Course Structure

This course consists of two parts – an online pre-course lecture on veneer preparations and two days of face-to-face live in-person hands-on training.

Important Information

The participants must complete, before attending the face-to-face course, an online lecture.

The pre-recorded online lecture on veneer preparations will show you the latest techniques for minimally invasive veneers and will include:

- The use of preparation matrices to guide tooth preps
- When to use Conventional vs slice preps
- Prepress veneers and when they can and can't be used
- The importance of dentine sealing after preparation
- Feldspathic vs Emax restorations and how to choose which to use
- Impression techniques to ensure no distorted models
- How to avoid black triangles
- Geller Models vs standard modes for the fabrication of the Veneers
- Diagnostic waxing and prototypes

Day 1

- The morning session will consist of a Smile Design lecture which will include:
- How to choose between creating a natural smile or a media smile for your patient.
- Cosmetic Imaging techniques for sales and treatment planning
- Assessing Occlusal vertical dimension
- Creating the correct Occlusal planes for the full mouth recon.
- Choosing the ideal centre line for your patient.
- Communication with the technician the correct smile line and anterior Occlusal plane.
- Creating ideal aesthetics by incorporating golden proportion into your restorations.
- Understanding Anterior tooth shapes and anatomy to create beautiful Anterior composite and porcelain restorations

The afternoon session will consist of veneer preparation hands-on training practical.

Day 2

- Using phonetics to ensure correct tooth profiles
- Lip lines and central incisor dominance
- 50:40:30 rule for contact areas
- Importance of the Dennis Tarnow rule for eliminating black triangle disease.
- Creating the ideal buccal corridor and changing emergence profile v banana teeth
- Soft tissue aesthetics
- Restorative solutions to uneven gingival margins
- Use of pink composite and porcelain to mimic gingival tissue.
- Using Anterior restorative Ortho GDP techniques to create ideal aesthetics prior to restoring

The afternoon session will consist of a veneer cementation hands-on training practical.

Teaching Methods

Formal and didactic lectures, case studies and discussion.

The hands-on training session will consist of the practice of skills.
