

Direct veneers, complex posterior restorations with modern & predictable techniques

HANDS-ON TRAINING

Dr Simone Moretto, Brazil
D.D.S., Msc., Ph.D.

14CE
Credits

 **DATE:**
18-19 Mar 2022 | 09:00 - 18:00

 **LOCATION:**
CAPP Training Institute | Dubai | UAE

 **TARGET AUDIENCE:**
General Dentists

Abstract

The aim of this course is to present a detailed series of easy and predictable techniques for anterior and posterior restorations that will enable clinicians to create first-class aesthetics direct restorations but in a quicker and more affordable way. Together with a simplified polishing technique and a detailed surface characterization you can achieve the perfect reflection of the light for restorations as aesthetic as indirect ones and with a reduced and cost-efficient inventory.

Dr Moretto will provide a logical, simplified, detailed and practical approach to rebuild different anterior and posterior cavities using direct composite resin restorations.

Learning Objectives & Outcomes

- Learn how to create highly esthetic anterior and posterior restorations in an easy and predictable way
- Fundamentals of colours
- Optimization of shade selection
- Selection of appropriate resin composite for each cavity design and which features they should have
- Treatment of wear cases
- Detailed step by step for cusp reduction and optimized restoration for big cavities with fragile walls
- Clinical cases detailing the entire procedure for different anterior restorations

Agenda Day 1

9:00 – 10:45	Lecture: Restoring wear cases on daily practice in an easy and predictable way. Concept – The use of a transparent silicone material and an injectable resin composite with high flexural strength and wear resistance make it possible to translate a diagnostic wax-up into composite restorations with high strength and gloss. Direct veneers with high aesthetics in a few steps. Step by step technique and clinical tips.
10:45 – 11:00	Coffee Break
11:00 – 13:00	Demo & hands-on: IMT Anterior: Different techniques to achieve the best result with fast and simple steps for a veneer: Conventional Injection Moulding Technique. Finishing and Polishing
13:00 – 14:30	Lunch
14:30 – 15:30	Demo & hands-on: IMT Anterior: Different techniques to achieve the best result with fast and simple steps for a veneer: Combination Injection Moulding Technique + Layering (enhancing your aesthetics)
15:30 – 15:45	Coffee Break
15:45 – 17:30	Demo & hands-on: IMT Posterior: The alternated technique – the restoration of a quadrant Stamp technique – inject the design you want for precise anatomy and minimum occlusal adjustments

Agenda Day 2

9:00 – 10:45	Lecture: Colour perception for recreating natural-looking on anterior direct restorations: Overview on fundamentals of colour and how to master the luminosity of the composite for a colour-live restoration
10:45 – 11:00	Coffee Break
11:00 – 13:00	Demo & hands-on: Class IV: How to bring a tooth back to life with a simplified layering technique with a high-end result on Class IV. Restauration of a big Class IV cavity: Bevel design, mock-up, correct thickness and length of each layer. Micro and macro surface characterization. Finishing and Polishing
13:00 – 14:30	Lunch
14:30 – 15:30	Demo & hands-on: Class I: How to achieve first-class class IV aesthetic restorations with a reduced inventory and simplified polishing with a time and cost-efficient material: Restauration of a Class I cavity with the brushing technique The chameleon effect: 1 shade matching 4 different V-shades
15:30 – 15:45	Coffee Break
15:45 – 17:30	Demo & hands-on: Overlay: How to make a cusp reconstruction in a practical way. Restauration of a big Class II cavity with a cusp coverage. The use a glass-reinforced composite to reinforce fragile teeth. The use of a silicone key for cusp reconstruction
17:30	Final discussion and end of the programme

Teaching Methods

Formal and didactic lectures, case studies and discussion.
The hands-on training session will consist of the practice of skills.
