

Direct veneers, peg lateral and diastema closing restorations

HANDS-ON COURSE / ONLINE

20-21 May 2021
Thur-Fri | 09:00 - 18:00

Online Live &
CAPP Training Institute

Area of interest:
General Dentistry,
Cosmetic Dentistry

Dr Eduardo Mahn
Chile

Abstract

The course will cover the necessary knowledge to know what to do when spaces, stains or undesirable forms are present in the anterior region. First, the participants will evaluate the model and plan how to prepare, if necessary. Afterwards, the participants will prepare the teeth and will have to restore them one by one keeping the proportions. Several techniques for closing diastemas, restoring peg laterals, large class IV and direct veneers will be shown. The pulling technique, the reverse pulling technique, the FEM technique and the Wing technique will be explained in detail. All will be based on the 3x5 concept. The Hands-on will finish with the demonstration of finishing and polishing. All the steps will be shown by the instructor with an HD camera with high magnification for the explanation of all the details...
