

# Aesthetic Realization. Connection between Dentists and Technicians

VIRTUAL CLASSROOM

22 November 2020  
Sunday | 14:00 - 18:00

Online Event

Area of interest: Dental Lab,  
Cosmetic Dentistry, Prosthodontics,  
Restorative Dentistry

Eric Berger  
France

## Abstract

The livestream demonstration will evaluate if you have a P.O.P (Personal Oral Protocol)? The operating mode from A to Z live for the development of an aesthetic project. The daily use of digital tools forces us to find a method to simplify our actions. To optimize our working time by increasing the quality of our prosthetic achievements, we need to ask ourselves the right questions; What information is necessary for the creation of an aesthetic prosthesis (photo, spectrophotometric study, digital impression, mandibular dynamic information); How to simplify these steps to make them accessible on a daily basis (integration of the Raypliquer spectrophotometer).

To answer this, we will discuss several areas during the master class. Initially, the course will describe the P.O.P "Personal Oral Protocol" protocol. Secondly, we will go over how to use the Rayplicker spectrophotometer. Shade taking and photo-transfer into the study software what information the software gives and how to use it. Thirdly, the choice of materials according to the color; For a realization in the office (chair-side technic); and for... [more info on www.cappmea.com/courses](http://www.cappmea.com/courses)

## Learning Objectives

By the end of the day delegates should have a better appreciation of:

- Demonstrate the right quality for creation of aesthetic prosthesis
- Define the Personal Oral Protocol
- Evaluate shade taking and photo-transfer
- Assess when to use layering
