HANDS-ON COURSE

 23-24 August 2019
Friday-Saturday
09:00 - 18:00

 CAPP Training Institute
Dubai | UAE

 Area of interest:
General Dentistry

 AED 2,500
\$ 680

Caroline Bilen, UAE

Caroline is recognised as a leader, consultant and trainer in the healthcare and accreditation industry. She has a BSN degree in nursing with a solid medical background and more than 25 years of extensive experience in out-patient and in-patient care as well as in dental care management.

Course Objectives

Upon completion of this course, you will be able to:

- Understand the compliance of infection control regulations and recommendations of advisory agencies.
- Differentiate the source transmission of pathogenic organisms in the dental health care setting and strategies for prevention and control.
- Understand and execute the engineering 6 and work practice controls, which reduce the risk of patient and dental health care worker exposure to potentially infectious material.
- Able to select and use the personal protective equipment to prevent patient and dental health care worker contact with potentially infectious material.
- Create and maintain a safe environment for patient care, by adhering to best practices for cleaning, disinfection, and sterilisation.
- Select appropriate measures to prevent and control infectious and communicable diseases in dental health care workers.
