

Ceramic Veneers from the Diagnosis and Preparation to the Temporisation and Cementation

HANDS-ON COURSE / ONLINE

24-25 November 2021
Wed-Thur | 09:00 - 18:00

Online Live &
CAPP Training Institute

Area of interest:
General Dentistry,
Cosmetic Dentistry

Dr Eduardo Mahn
Chile

Abstract

The theoretical part will cover all aspects of the face analysis. Starting from pictures and adequate videos. The facial parameters and mostly used lines will be shown and discussed. A new concept, the Facial Flow Concept will be presented together with the advantages of the dynamic face analysis. New studies about tooth form and the correlation with them with gender and age will also be discussed.

The hands-on part will teach how to insert the pictures in traditional software, how to analyze a video and create pictures from it. Later on, several clinical cases will be analyzed based on the new concepts presented before. The treatment plans are going to be created by the participants and contrasted with the ones that were originally done. The new concepts presented in the morning are going to be discussed and applied.... [more info on www.cappmea.com/courses](http://www.cappmea.com/courses)

Course Objectives

- Understand the importance of proper planning and diagnostics
- Understand how to apply facial parameters
- Understand how to take adequate pictures and videos for face analysis
- Understand how to prepare and cement veneers
- Learn about ceramic science
- Learn about colour matching and tooth form selection

CAPP

ADA CERP® | Continuing Education
Recognition Program

Centre for Advanced Professional Practices (CAPP) is an ADA CERP Recognized Provider. ADA CERP is a service of the American Dental Association to assist dental professionals in identifying quality providers of continuing dental education. ADA CERP does not approve or endorse individual courses or instructors, nor does it imply acceptance of credit hours by boards of dentistry.

CAPP designates this activity for 14 CE Credits
