Restorative Dentistry
Oral and Maxillofacial Surgery

Abstract

Minimally Invasive Surgical Aesthetic (MISA) treatments' demand is rapidly rising in the Middle East region. Therefore, physicians are always looking for ways to update their knowledge and gain more confidence in applying such treatments. Dentists in particular, are keen to add such services in their practice that comes in handy when planning that perfect smile. We are proposing a structured workshop offering our interested candidates a full understanding of the diagnosis and management in aesthetic treatments using Botulinum Toxin and injectable dermal fillers in the head and neck area.

Course Objectives

- Understand and identify the related head and neck anatomy involved in MISA treatments
- Recognise the aging process and stages of facial changes
- Facial analysis and Assessment
- Obtain the clinical and technical skills for MISA treatments
- Avoiding and treating complications associated with MISA treatments

Course Outline

- Related Head & Neck Anatomy
- Introduction Botulinum Toxin
- Botulinum Toxin Mixing, Preparation and Application
- Facial Analysis
- Introduction to Dermal Fillers
- Minimally invasive augmentation techniques
- Local Anaesthesia
- Complications, how to avoid it and how to deal with it
