## Course Objectives

The course will be instrumental in the understanding the following

- Diagnosis and Treatment Planning with cases where Veneers are the treatment of Choice
- Parameters that define Smile analysis and their application in treatment planning
- Records, Photographs: Views required and why? An essential for treatment planning and lab communication
- Occlusion and its role for long term success when planning a case for veneers
- Preparation of Ceramic Veneers through a guided process and steps taken for minimal invasion into the tooth tissues
- Tissue management and Impression techniques
- Different types of Ceramics; when to choose what
- Cementation protocols for Veneers
- Minimal Preparation and No preparation Veneers

## Abstract

Since centuries there has been a desire to look better and nicer. We all know that the smile is the biggest contrast on the human face and that makes it even more important to harmonize with the face. Though there is a never ending marketing machine to have whiter teeth and brighter teeth, but we all know that nature has a certain design element built it which can be modified to a limit.

The concepts and simplified techniques for Styleitaliano indirect will be presented in this course and will be practiced in a demo workshop as well... [more info on www.cappmea.com/courses](http://www.cappmea.com/courses)
