

Preparation for modern porcelain veneers: How to make minimal invasive thin veneers, partial and the modified non-prep veneers

HANDS-ON COURSE / ONLINE

 28 November 2021
Sun | 09:00 - 18:00

 Online Live &
CAPP Training Institute

 Area of interest:
General Dentistry, Cosmetic
Dentistry, Prosthodontics,
Restorative Dentistry

Dr Eduardo Mahn
Chile

Abstract

The course will start with a lecture that will cover the biological background necessary to make appropriate tooth preparations for all-ceramic restorations, specifically porcelain veneers. Different ceramics will be classified, in order to assess the properties of different materials and their indications. Advantages and disadvantages will be discussed. Classic preparations will be shown and compared with modern options. Afterwards, several clinical cases fully documented in high resolution will be presented showing a wide array of preparation techniques and cementation materials and protocols. A comparison between the needs for CAD-CAM and non-CAD-CAM restorations will be given...

Course Objectives

- Understand the biological principles of tooth preparations
- Indicate the right type of preparation depending on the patient needs
- Understand the advantages of certain materials for each indication
- Prepare for inlays, onlays, crowns and veneers, based on the limitations and advantages of CAD-CAM and non-CAD-CAM technology.
- Understand the geometry necessary for improvements of fit and duration of all-ceramic CAD-CAM and non-CAD-CAM restorations.

Important Note

The course is designed and planned for CAD-CAM users as well as non-CAD-CAM users
